Using Microsoft Authenticator for MFA

Sign in to an MFA-enabled BCM application and complete authentication with Microsoft Authenticator.

Sign in

1. Enter your BCM username in this format: **ECA@bcm.edu**.

Use your ECA username, not your friendly email address. If the browser remembers your account, select it from Pick an account.

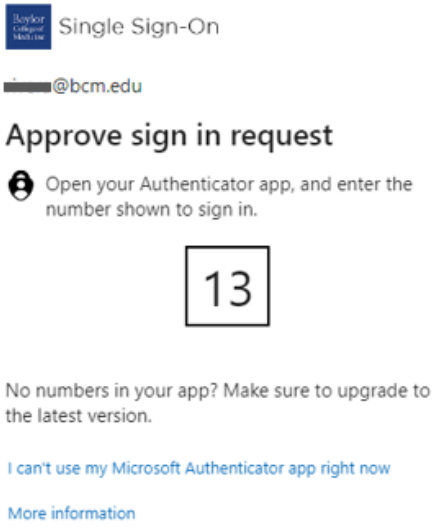

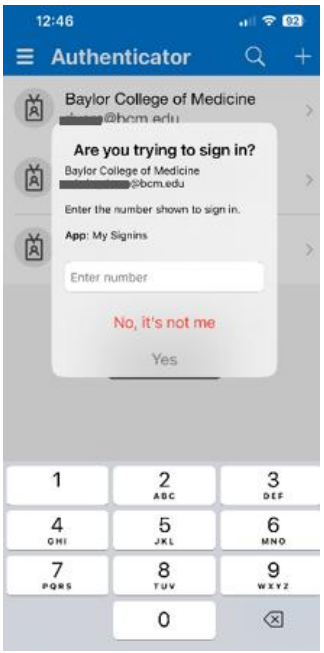

Enter your ECA username, then enter your password.

2. Enter your password and select **Sign in**. If prompted, continue to the Microsoft Authenticator request.

Approve the sign-in request

When prompted for MFA, the sign-in page displays a two-digit number.

1. Open Microsoft Authenticator on your phone.

2. Enter the number shown on the sign-in page.

3. Confirm that the sign-in details are yours, then select **Yes**.

Use a verification code when push approval is unavailable

Push approval requires an internet connection on your phone. If your phone has no Wi-Fi or cellular data, use the rotating code in Microsoft Authenticator.

1. On the sign-in page, select **I can't use my Microsoft Authenticator app right now**.

2. Select **Use a verification code**.

3. Open Microsoft Authenticator and locate the six-digit one-time password for your BCM account.

4. Enter the code on the sign-in page and select **Verify**.
